DETAILED ACTION

Allowable Subject Matter

Claims 4-18, 20-70, 73-202 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 4, 5, 7, 8, 10, 12, 13, 15, 18, 32, 56, 67-70, 73, 93, 102, 134, 146, 149, 158, 168, 184-188 with the important features being; the aspheric surfaces; the conditional formula pertaining to specific focal lengths; NA; WD; X1; X3; ENP; PD; PT; CA; SA; radius of curvature of the objective lens; excessive axial chromatic aberration correction such that a focal length is made longer; the coupling lens is moved along an optical axis direction such that a variation of the spherical aberration generated at each optical surface of the light converging optical system is corrected; the specific gravity of 2.0 or less. Therefore claims 4-18, 20-70, 73-202 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
